

VENKAT B M

☎ 8073580509 ✉ venkatbm1999@gmail.com  LinkedIn  Github  Portfolio

CAREER OBJECTIVE:

Motivated backend developer with strong expertise in Java, Spring Boot, and microservices. Experienced in designing secure, scalable RESTful APIs and validating workflows using API Gateway, Eureka, and Postman. Passionate about contributing to Cognizant's projects with a focus on efficiency, collaboration, and continuous learning.

EDUCATIONAL QUALIFICATION:

Bachelor of Technology in Computer Science and Engineering 12/2021 – 11/2025
Presidency University
Bangalore, India
Cum.GPA: 9.47/10

Pre- University 06/2019 – 05/2021
Presidency PU College
Sira, India
Percentage: 98.64%

SSLC 2018 – 2019
Cordial School
Madhugiri, India
Percentage: 93.92%

INTERNSHIPS

Web Development Intern – Octanet Pvt Ltd 07/2024 – 08/2024
Bangalore, India

- Built a responsive landing page using HTML, CSS, ensuring cross-browser compatibility.
- Developed a To-Do List app using React for efficient state management and reusable components.

Software Development Intern – Codsoft 09/2023 – 10/2023
Bangalore, India

- Developed and maintained scalable Java applications.
- Designed complex systems following object-oriented principles.
- Participated in code reviews and agile processes, improving team collaboration and code quality.

PROJECTS

Vehicle Service Booking Management System (VSBS) 08/2025 – 11/2025

Technologies Used: React, Java, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, MySQL, Postman

- Built a full-stack vehicle service booking system with a React frontend and a Spring Boot REST API backend.
- Developed secure user login, booking management, and admin operations with Spring Security and role-based access control.
- Integrated MySQL using Hibernate/JPA for persistent data handling.
- Implemented responsive React UI and connected it to backend APIs using Axios.
- Thoroughly tested all backend endpoints using Postman.

Smart Charging App for EV

Patent Application No.: 202541004791 A | **Filed on:** 21 Jan 2025 | **Published:** 31 Jan 2025 | **Inventor:** Venkat B M

- Developed and filed a patent for an AI-assisted smart charging system for electric vehicles, enhancing efficiency and usability.
- Designed and built a mobile application using Android Studio, integrating AI-driven predictive algorithms for optimized charging.
- Implemented real-time charging slot booking, UPI-enabled payment gateways, and dynamic pricing models based on usage patterns.

TECHNICAL SKILLS

- **Programming Languages:** Java.
- **Backend & Frameworks:** Spring Boot, RESTfull API ,Microservices.
- **Database:** MySQL.
- **Frontend :** React.
- **Tools:** Postman, Eclipse, Spring Tool Suite ,VS code.
